2017. However, the Group still recorded a profit in the annual results for the Year and is expected to record an increase in profit after tax of more than 100% for the Year as compared to that of the corresponding year ended 30 June 2017.

The estimated loss in the results of the Group in the second half of the Year is mainly attributable to (i) increased operating costs due to the strengthening of Thai baht and RMB against US dollars; (ii) lower sales volume due to seasonality; and (iii) increase in administrative expenses as the Group continues to invest in people and technology for the future business growth.

As the Company is still in the process of finalizing its audited consolidated results for the year ended 30 June 2018, the information in this announcement is only based on a preliminary assessment made by the Company's management according to the unaudited consolidated management accounts of the Group which has not been audited by the auditors of the Company.

Shareholders and potential investors are advised to exercise caution when dealing in the shares of the Company.
