**Hong Kong, 29 August 2016** — Top Form International Limited (“TFI” or “the Group”; Stock Code: 333), a leading brassiere manufacturing company, announced on 26 August 2016 its annual results for the year ended 30 June 2016.

TFI recorded sales revenue of HK\$1,179 million, a slight increase of 1%, compared to fiscal 2015; gross profit margin decreased to 18% from 19% in fiscal 2015. Nevertheless, the gross margin remained flat at 18% as compared to the second half of fiscal 2015. The Group’s after tax profit declined by 5% to HK\$34.3 million; earnings per share is HK\$0.15. The Board proposed to declare a final dividend of HK\$0.05 per share.

Adhering to TFI’s plan of expanding overseas capacity, by end of fiscal 2016, the proportion of the production from the overseas plants and China plants are 59% and 41% respectively. In this fiscal year, China accounted for 41% of global capacity, while Thailand and Cambodia accounted for 49% and 10% respectively.

In fiscal 2016, 59% of the Group’s sales were to the US market whilst the sales to the EU represented 27% and the rest of the world accounted for 14%. The continuous decline of average selling price resulting from the price driven demand in the business, along with the rising labor costs, contributed to the reduction of the gross profit and profit after tax in this fiscal year.

TFI’s financial position remains healthy with shareholders’ funds standing at HK\$558 million (2015: HK\$559 million) as at 30 June 2016. Bank balances and cash stood at HK\$167 million whilst credit facilities available to the Group amounted to HK\$149 million and gearing remained at an insignificant level.

Looking forward, the general outlook continues to be challenging. The Group does not expect an upturn in business and financial performance in the near future. TFI has been investing in projects and systems to improve its manufacturing methods, supply chain processes and product capabilities, to ensure the Group’s efficiency in the entire supply chain. These include the implementations of new production planning system and a Product Lifecycle Management (“PLM”) system for optimizing the product development and production planning processes.

At the meantime, the Group continues to expedite new plants locations, such as Yangon, Myanmar, to reduce its expenditure on labor cost, while serving as an option for the Group’s EU customers to enjoy duty saving imports from Myanmar.
